Layers

- adding to collection 130, 135, 141–145
- building maps 134
- defining with Data Providers 136–139
- draw order 135
- labeling 150
- MapInfo tables 64–65
- raster images 151
- searching 170–172
- searching SQL query defined 179–182
- using Layer control 234–239
- using the Map menu tools 230–232

Layers collection

- adding layers 130, 135, 141–145
- inserting a layer 148
- map building blocks 134–135
- map definitions 135
- methods 147–148
- moving a layer 148
- obtaining a layer 147
- obtaining layer names 147
- removing layers 148

LegendContainer Bean

- legend display 216
- managing legends 78
- new JavaBean 15, 17

Legends

- creating RangedTheme 215
- new feature description 15
- theme 207, 215–216
- using tags to display 113–114

Line caps

- Rendition stroke property 199

Line markers

- Rendition stroke property 198

Line objects

- displaying 195–199
- feature type 66

LinearRenditionSpreader object 211

Loading map data 124–125

Localization

- new feature description 17

LocalRenderer

- renderer type 55
